6.2" DVD/CD/USB with Bluetooth & Smart phone Link

HDMI

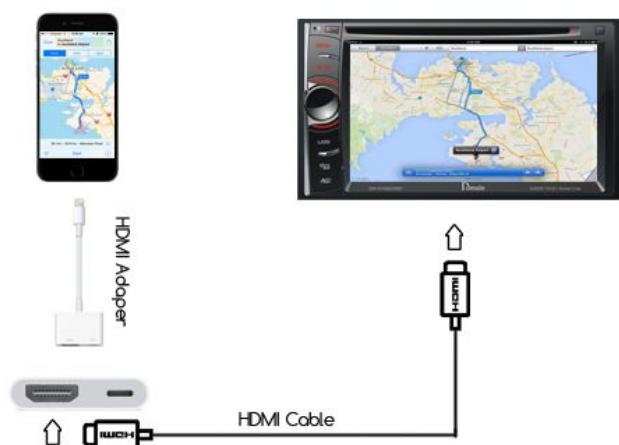

About Domain Smart Link

Smart link is the function of interconnection and sharing between smart phone screen and DVD screen. When you using smart link, you can synchronize the screen from your smart phone to DVD screen. The smart link function only can be used by **Smart phone with HDMI output.**

Connecting to Smart Phone

For details on compatible models, see "Compatible Smart Phone Models."

iPhone

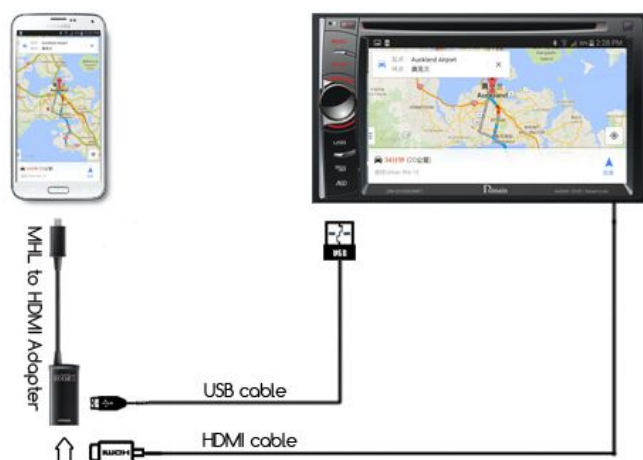

Pic 1

- ① Connect the iPhone to head unit using HDMI adapter and HDMI cable. See Pic1
- ② Connect you iPhone to the unit. Turn on Bluetooth function on the unit, then search Bluetooth devices on your iPhone, select 'Domain' in the pairing list. Enter default password '0000' if necessary.
- ③ Turn off portrait orientation lock at Setting >General > Lock Rotation on the iPhone.
- ④ Select the Smart Link icon on Head unit.

Android Phone

There are two connecting options for the Android phone. You can choose one of them based on the connecting accessories you have.

Pic 2

Pic 3

- ① Get SmartLink app:
Method 1: Select SmartLink on head unit and select smart phone type 'Android'. Then scan the QR code¹ to download and install 'SmartLink' app.
Method 2: Download the SmartLink app from URL:
<http://sppub.foryoutsp.com:8087/downandroid>
- ② Connect the smart phone to head unit.
Option 1: Connect head unit to you Android phone with MHL-HDMI adapter and HDMI cable. You also need to connect MHL-HDMI adapter to the USB slot on the head unit by USB cable(supplied with MHL-HDMI adapter). See Pic 2.
Option 2: Connect head unit to you Android phone via special 'Quick link cable'(sold separately). See Pic 3
- ③ Connect you smart phone to the unit. Turn on Bluetooth function on the unit, then search Bluetooth devices on your phone, select 'Domain' in the pairing list.

Enter default password '0000' if necessary.

④ Select 'SmartLink' on head unit. The SmartLink app will automatically run on your phone. Select Stereo > DONE on the SmartLink app².

⑤ Press Home button on your phone and back to home page.

Note

1. You can download QR code scanner from Google Play or other Android app markets, or you can use other apps with QR code scan function, for example: WeChat.

2. You may need to ignore some information appeared on the screen such as "HDMI Disconnection" or "Error Message" as long as your smart phone has been mirrored to the DVD unit.

Attention

***The Smart Link function only can be used by Smart Phone with HDMI output and have compatible system version.**
